Questions for Imad

-Asking him what his highest priorities are in our epics.

- Flow
- Percentage
- History

Other Tech Options

-Current: Android Studio (Java)

-Mobile frameworks:

        Ionic (Angular JS, Apache Cordova - HTML, CSS, JavaScript)

        Meteor (Node JS, JavaScript, MongoDB)

Web framework:

        Ruby on Rails (Ruby)

        Django (Python)

        Flask (CSS HTML Javascript)

Matthew's suggestions:

- Most preferred
  - jQuery for ajax (and any other js needs)
  - Ruby on Rails (comes with Puma server by default)
  - mySQL backend
- Second-most preferred
  - Android app
  - PHP for DB queries
  - mySQL backend
- Third-most preferred
  - Ionic
    - This one is scary and I don't want to do it
- The absolute best choice
  - Physical system
    - Build board out of a sheet of cardboard, a sharpie marker, and some post-it notes
    - Send private messages by paper airplane
    - Charge Imad cash for access
    - Hire freshmen to:
      - Calculate statistics with TI-83 Plus or TI-84 calculator
      - Create duplicate of board when we want to save
    - Equip developers with shock collars to prevent them from from getting too close to the product backlog
